

Never Miss a Beat

Wristop Monitoring on the Move

MDKeeper™ Family

MDKeeper™: Innovative Wristop Vital Signs Monitor

Remote Monitoring on the Move

Effortless, uninterrupted vital signs monitoring. Anytime, anywhere. That's the key to Aerotel's MDKeeper™ – an innovative remote wireless monitoring solution for mobile-health and homecare applications. With MDKeeper™, the elderly or chronically ill can maintain a normal lifestyle without being confined to their homes or making frequent visits to their doctor.

Powerful Wearable eHealth System

MDKeeper™ integrates unique, powerful biosensors into a lightweight wearable device. It monitors multiple vital signs (such as pulse rate, 1-lead ECG and blood oxygen saturation level) without discomforting its users, even when they are on the move.

Real-Time Transmission and Analysis

Using its proprietary integrated expert system, MDKeeper™ stores and analyzes patient data. The data is transmitted, either in real-time or on a daily basis, to a remote medical center for further analysis and care, via its built-in Siemens Wireless Module.

Easy Integration with External Systems

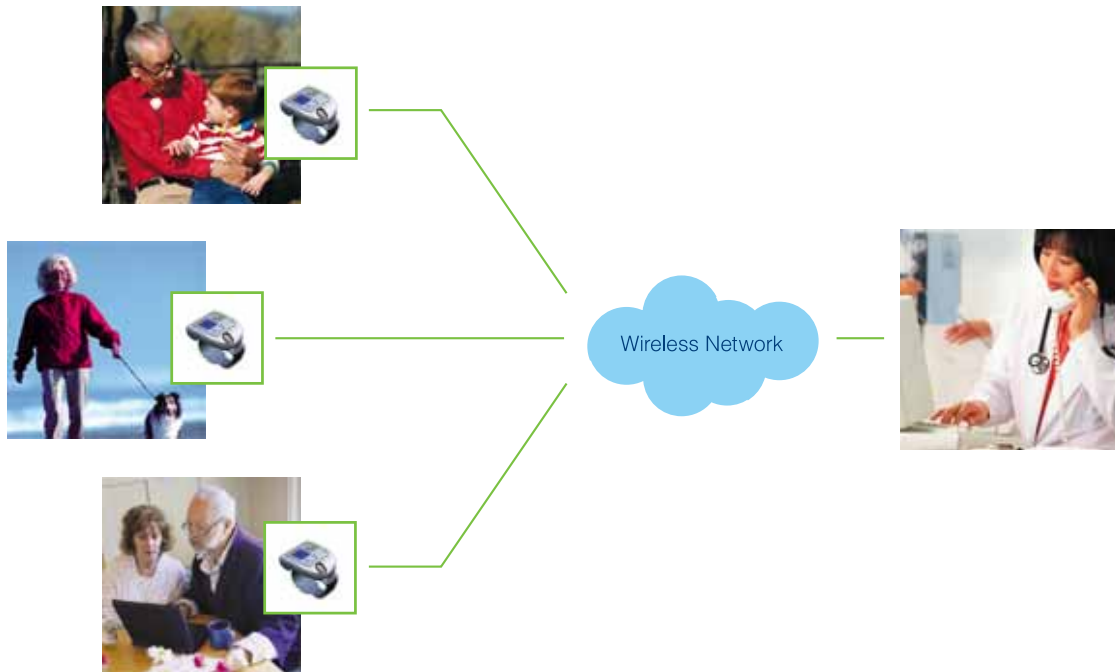

MDKeeper™ can communicate with remote hospital information systems, integrating its data into existing and emerging telehealth applications, electronic patient records (EPR) and other online data analysis and clinical decision support systems.

MDKeeper™ is currently undergoing clinical certification for FDA and CE approval. Several patents are pending.

Technology for Easy Life

MDKeeper™ Real-Time Monitoring of Patient's Vital Signs.
Anytime, Anywhere.

Aerotel is committed to advancing the standards of personal health and safety through the development of innovative wearable devices combining state-of-the-art wireless communications with advanced biomedical sensors.

Aerotel offers sophisticated, yet easy-to-use, mobile monitoring solutions enabling effortless and continuous remote monitoring from anywhere, at anytime.

Our proprietary products seamlessly transmit situation-based and location-based data in real-time, for online monitoring, analysis and care.

Aerotel's develops innovative wireless monitoring solutions for improving people's health, safety and quality of life.

Our products provide peace of mind for users, their families and caregivers.
